Course Descriptions for BBA Online

Courses for Business Core (effective Fall 2014) -- 57 Hours

**BULW 1370 Business Environment and Public Policy**  Survey Course emphasizing interaction of business with its external and internal environments. Introduction to public policy process and issues with focus on ethical and moral considerations.

**MISY 1373 Introduction to Business Technologies**  Computers are an integral part of all business activities and careers. This course is designed to introduce potential business majors to the understanding of the roles of computers in business information systems and to learn the basic skills of business software which are essential to support business activities. Students will obtain valuable information, technology knowledge and skills needed in all areas of business. Students will be introduced to the spreadsheets, databases, and basic business transactions using SAP enterprise resource planning software.

**BUSI 2300 Introduction to Critical Thinking in Business Decision Making**  This course will introduce students to basic concepts and tools that improve the students’ analytical skills by familiarizing them with the basic principles involved in the theory and practice of critical thinking for reasoned decision-making. Students will use data visualization software such as Tableau that can help them find real answers in their data. The basics of professional business communication will be introduced and students will have the opportunity to write business documents. Prerequisite: BULW 1370

**ECON 2301 Principles of Economics I (Macro)**  Emphasizes monetary theory; national income analysis; fluctuation and growth; public finance; international trade; and current economic problems.

**ECON 2302 Principles of Economics II (Micro)**  Introduction to economic principles; allocation of resources; determination of output and prices; distribution; and managerial economics.

**ACCT 2302 Introduction to Managerial Accounting**  This course is designed for non-accounting majors. Uses of accounting information in managerial planning, decision making, and
control. Includes study of cost behavior, cost-volume-profit analyses and budgeting.
Prerequisite: ACCT 2301 with a minimum grade of “C”.

**BUAL 2310 Business Analysis I** Introduction to the quantitative methods of analysis as applied to business problems. Topics of study include collection of data, statistical description, probability theory, probability distribution, sampling theory, estimation of parameters and testing hypothesis. Prerequisite: MATH 1325.

**BUAL 3320 Business Analysis II** Emphasis on use of statistics in business decision-making. Topics of study include hypothesis testing, inferences between two populations, analysis of variance, chi-squared and other non-parametric tests, simple-multiple linear regression/correlation analysis, classical time series analysis, and index numbers. Prerequisites: Junior Standing and BUAL 2310.

**ECON 3340 Macro Economics** A descriptive-analytical approach to the dynamic forces that influence the aggregate level of economic activity. Income and employment determinants; levels of income and employment, stabilization theory investment and income relationship; monetary and fiscal policies. Prerequisites: Junior Standing and ECON 2301.

**FINC 3310 Principles of Finance** An introductory survey of the principal issues, decision areas, and analytical procedures relevant to the financial management of private business firms including capital budgeting, cost of capital, short and long-term financing, dividend policy and valuation. Prerequisites: Junior Standing and ACCT 2301, ACCT 2302, ECON 2301, ECON 2302, and MATH 1314 (MATH 1325 preferred).

**MGMT 3310 Principles of Organizational Behavior Management** Includes the study of organization behavior concepts such as leadership, motivation, individual behavior, group behavior, and communication. Their use in U.S. and multinational organizations in management practice is examined in the context of today’s legal, social, and ethical environment. Prerequisites: Junior Standing and BUSI 2300.

**MKTG 3310 Principles of Marketing** A description and analysis of business activities designed to plan price, promote, and distribute products and services to customers. Topics studied include: the marketing environment, consumer buying habits and motive, types of middlemen, marketing institutions and channels, governmental regulations, advertising, and current marketing practices. Prerequisite: Junior Standing.

**BCOM 3350 Business Communications** Emphasis on practical applications of business writing and speaking scenarios. Course covers how to write memos, letter, resumes, analytical reports, and how to give a professional oral presentation. Prerequisite: Junior Standing.

**MGMT 3320 Production Management** A survey of the production function and the analytical tools used to solve problems associated with the development and operation of a production system. Analytical tools include: linear programming, critical path scheduling, waiting line, statistical quality control, and forecasting. Prerequisites: Junior Standing and BUAL 2310 and BUSI 2300.
MISY 3310 Management Information Systems  This course gives an overview of why information systems are so important today and how they are transforming organizations and management. The student will understand the relationship between the various types of information systems. They will learn to analyze the relationship between information systems and organizations. Also, students will learn how a database management system organizes information. Students would compare the various types of telecommunications networks and network services and become knowledgeable about new business applications. Students are introduced to basic business transactions, such as Enterprise Resource Planning (ERP), Supply Chain Management (SCM), Customer Relationship Management (CRM), and Knowledge Management (KM). The course also covers how the internet can be used for electronic commerce and for electronic business, how the internet is becoming the foundation for new business models, new business processes, and new ways of distributing knowledge. The students will develop proficiency in using application tools, such as spreadsheet and database, for development of Information Systems. In addition, the students are introduced to basic business transactions using SAP -- a widely used Enterprise Resource Planning (ERP) software among the Fortune 500 companies. Prerequisites: Junior Standing and MISY 1373.

BULW 4390 Special Topics in Business Law  This course is currently a place filler for a course that has not yet been developed. The content of this course will be determined by the College of Business. Until the course is developed, a 3000-4000 level business elective will be substituted for this course if the student is nearing graduation.

MGMT 4370 Strategic Analysis  The capstone course for the undergraduate business program. This course has been developed to help you understand the task of the strategic management process in a digital global environment. The course assumes that a company’s success depends on you to adapt to rapidly changing markets, globalization, shifting governmental policies, and new technologies. The emphasis of this course will be on sharpening analytical, decision-making, and communication skills. The case study method and/or a global simulation will be used to acquaint the student with probable, authentic strategic situations in the economy. Prerequisites: Junior Standing and FINC 3310, MGMT 3310, MGMT 3320, and MKTG 3310.

Major Specialization Courses for Various Business Majors:
